VIRTUAL PRIVATE SERVERS

DEDICATED FUNCTIONALITY WITHOUT THE EXPENSE!

FEATURES

- ✓ Secure, state-of-the-art hosting environment
- ✓ Root access
- ✓ Install your own software configurations
- ✓ Reboot anytime
- ✓ Monitor resource usage
- ✓ Keep track of traffic statistics in real time

VPS SERVER FEATURES

HIGH AVAILABILITY

Webqom's High Availability option provides the redundancy necessary to ensure maximum network uptime, and at the same time giving more processing power and greater ease of use.

HIGH-END SERVER HARD DRIVES HAVE SPEEDS OF 15,000 RPM

Fast rotation speed with high data transfer rates, because this is most obvious advantage of fast spindle speeds. Combining high rotation speeds with top-notch recording technologies such as PMR (perpendicular magnetic recording) has repeatedly managed to establish new speed records.

PRIMARY AND SLAVE DNS SERVERS

Given the importance of DNS in marking services and entire networks accessible, Webqom's authoritative DNS servers have built-in redundancy, setup as a master or a slave in its configuration.

LOWER OVERALL COST - 75% SAVINGS

Server consolidation reduces the cost of servers, makes more efficient use of data center space, and reduces energy consumption; all of these factors reduce the total cost of ownership. Over a three-year lifecycle, a virtual machine costs approximately 75% less to operate than a physical server.

FAST PROVISIONING

Procuring a physical machine can take days or weeks. In contrast, a virtual machine can be provisioned in one business day

DYNAMIC LOAD BALANCING

Mobile-enable backend apps and build native mobile apps.

MANAGED SERVICES

Benefit from a fully-managed, enterprise-optimised IaaS cloud that offers SLAs with up to 99.99% virtual server uptime.

ONE CLICK OS TEMPLATES

Select a pre-made OS template and deploy it instantly with one click.
